Global Supply Census and Ecosystem Architecture of NSFW AI Companion and Roleplay Platforms

Ecosystem Taxonomy and Structural Decoupling

The supply landscape of adult-oriented (NSFW) artificial intelligence companion and roleplay chat platforms has evolved from monolithic, single-vendor web applications into a decoupled, four-tier technical stack. While commercial market entrants predominantly operate as vertically integrated hosted platforms, community-driven supply has coalesced around modular architectures that separate user interfaces, character metadata repositories, and language model inference backends. This structural bifurcation is driven primarily by content moderation shifts and payment processor restrictions on mainstream platforms—most notably Character.AI, Replika, and Yodayo—which periodically trigger user migrations toward uncensored or self-hosted alternatives.

Within the hosted platform tier, supply further subdivides into two operational paradigms: community-catalog roleplay platforms and visual-companion ("AI girlfriend/boyfriend") simulators. Community-catalog platforms such as Janitor AI, SpicyChat AI, CrushOn.AI, and WyvernChat prioritize text-driven narrative roleplay, user-submitted character definitions, lorebooks, and bring-your-own-key (BYOK) proxy integrations. Conversely, visual-companion platforms such as Candy AI, OurDream AI, DreamGF, Kupid AI, and Soulkyn bundle conversational interfaces with integrated image generation (often utilizing Stable Diffusion XL or Flux LoRA pipelines), short-form video synthesis, real-time voice calling, and Bluetooth hardware synchronization (such as Lovense device integration).

Ecosystem Role	Structural Function	Primary Technical Mechanisms	Representative Supply Entities
Hosted Platform	End-to-end cloud service providing user interface, character hosting, and managed or proxy model inference.	Browser WebSockets, Telegram bots, mobile PWAs/APKs, multi-tiered subscription/token paywalls, integrated TTS and image/video diffusion.	Janitor AI, SpicyChat AI, CrushOn.AI, Candy AI, OurDream AI, PolyBuzz, Muah AI, Nomi AI, Kindroid, Soulkyn.
Frontend / Local Tool	Client-side or self-hosted orchestration	Local Node.js/Docker installs or	SillyTavern, Agnaistic (Agnai),

	harness managing prompt assembly, context windows, and memory without locking users to a single model vendor.	desktop binaries; supports W++, SBF, and Boostyle card formats, keyword-triggered lorebooks, and vector embeddings.	Backyard AI (Faraday.dev), KoboldAI / KoboldCpp, HammerAI, HeatherBot.
Card / Lore Hub	Public repository for indexing, sharing, and exporting structured character definitions and world-info lorebooks.	JSON and metadata-embedded PNG character cards, lorebook scripts, direct URL import APIs for SillyTavern and Janitor AI.	Chub.ai (Venus Chub), CharacterHub.org, AI Character Cards, Character Tavern, JannyAI, CAI Bot List.
Model / API	Underlying language model weights, fine-tunes, or unified API routing gateways executing uncensored text generation.	Abliterated/derestricted GGUF weights for local llama.cpp/Ollama execution, or cloud API aggregators routing to DeepSeek, Claude, Mistral,	OpenRouter, Pygmalion AI, HauhauCS Uncensored Models, Huihui Abliterated Models, AI Horde, NanoGPT.

		or Qwen.	
Other (Infra & Eval)	Specialized evaluation benchmarks, voice-cloning engines, body-state simulation plugins, and browser wrappers.	Zero-shot TTS (GPT-SoVITS, CosyVoice), binaural HRIR audio processing, Supabase state tracking, and roleplay model refusal benchmarks.	Unhinged ERP Benchmark, Tidefall, Callhome, GPT-SoVITS, Sigma Browser Uncensored AI.

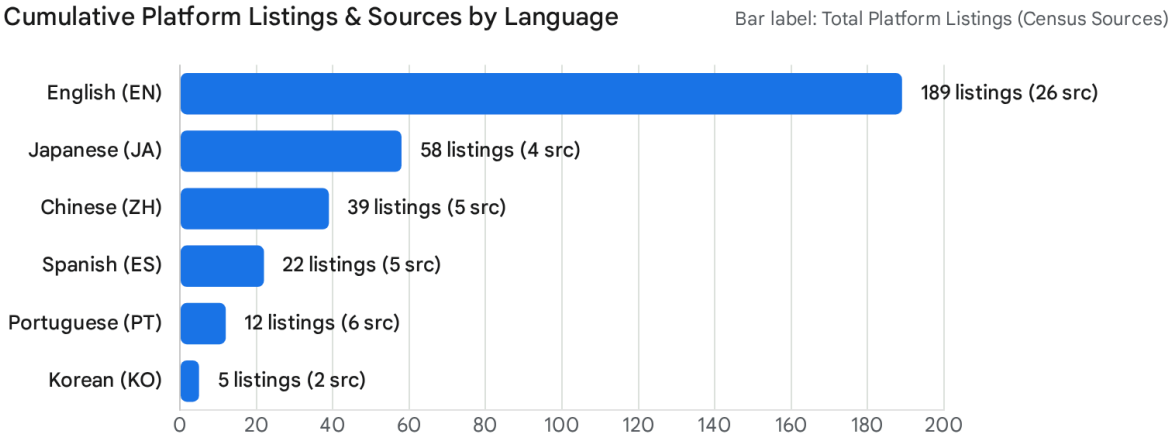

The interplay between these layers explains how platforms sustain operations despite high compute costs. Because running 70B+ parameter models or multimodal diffusion pipelines is capital-intensive, platforms like Janitor AI, Chily Tavern, and Agnaistic offload inference costs by allowing users to connect external API keys (such as OpenRouter, NanoGPT, OpenAI, Anthropic Claude, or Cohere) or crowd-sourced distributed clusters like AI Horde. Simultaneously, local model communities on Hugging Face and Reddit (r/LocalLLaMA) continuously produce "abliterated," "heretic," and "derestricted" variants of base models (such as Qwen 3.5, GLM 4.5/4.7, and Mistral Nemo) by orthogonalizing refusal vectors in the model weights, enabling unrestricted local execution via KoboldCpp, Ollama, or Backyard AI.

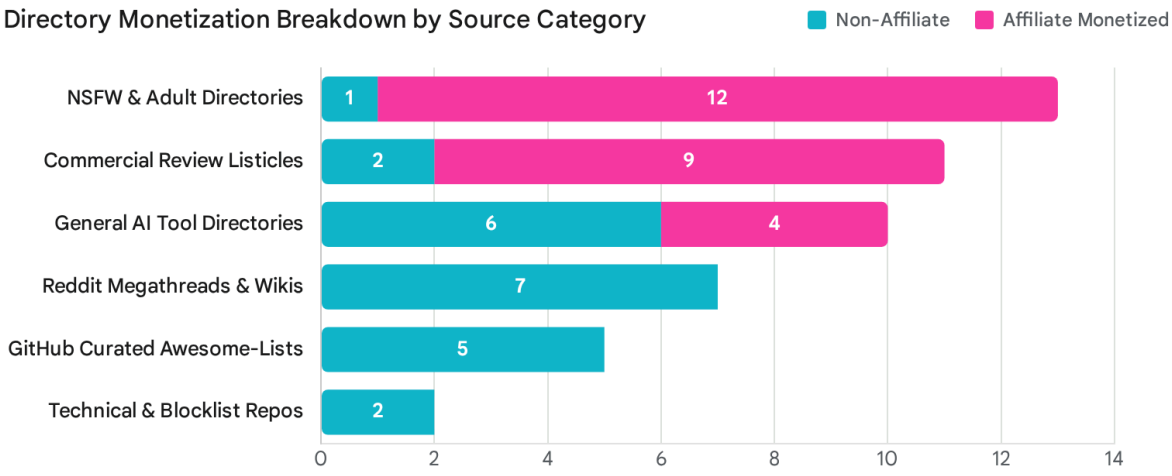

Multilingual Discovery Topology and Source Indexing Patterns

A census of 48 distinct list-type sources across six languages—English (en), Japanese (ja), Chinese (zh), Korean (ko), Spanish (es), and Portuguese (pt)—reveals sharp structural divergence in how platforms are indexed and discovered globally. In English-language ecosystems,

discovery is bifurcated between network-level security blocklists (such as Firewalla's nsfw-ai.txt, which indexes 86 distinct domains for parental filtering) and organic community migration hubs (r/CharacterAIrunaways, r/CharacterAi_NSFW, and GitHub awesome-lists). Community threads predominantly index platforms offering unthrottled free tiers, BYOK compatibility, and deep lorebook support, such as Janitor AI, Chub.ai, SillyTavern, Perchance AI, Loremate AI, WyvernChat, and Saucepan AI.

Affiliate Monetization Dominates Multilingual NSFW Directories While Community Hubs Index Open Ecosystems

English and Japanese sources account for the largest volume of indexed platforms, while affiliate monetization is heavily concentrated in dedicated adult directories and regional review listicles.

Data sources: Firewalla Security Blocklist, Awesome AI Companions (GitHub), Reddit (r/CharacterAIrunaways), Reddit Alternatives Megathread, Toolify.ai, HoneyChat Technical Blog, ThePornDude Directory, FaceSwitch Blog, ToolAI Korea, AITing Directory, AIChattings Directory, Pippin Club Reviews, ThePornLinks Brazil, TheBestFetishSites, AIBase Database, AIBase Companion Catalog.

By contrast, non-English discovery channels exhibit distinct regional specializations and commercial incentives across Asian and European markets. Within Japanese (ja) directories and review blogs

(face-switch-ai.com, honeychat.bot, mellows.app) alongside localized adult aggregators (theporndude.com/ja), curation prioritizes native-level Japanese phrasing, 2D anime Aesthetics (LoRA-driven character consistency), and frictionless Telegram bot integration that bypasses email registration. In Chinese (zh) AI tool directories (top.aibase.com), listings blend global adult visual companion platforms—such as LustCrush, Tyan AI, Kupid AI, Veline AI, AmorLink AI, and FLIRTcam.ai—with domestic and overseas emotional companion applications like Glow-AI, Baidu's Xiaokan Planet, Cici, and Blush. Chinese industry analyses also document the proliferation of automated AI personas on Instagram and Telegram that funnel users into pay-per-message and pay-per-photo microtransactions. Meanwhile, Spanish (es) and Portuguese (pt) aggregators (aichattings.com, pippinclub.com, aihaven.com, erosiab.com, thepornlinks.com, thebestfetishsites.com) are heavily dominated by affiliate review portals and adult link directories that promote high-monetization hosted platforms (Candy AI, OurDream AI, Muah AI, GirlfriendGPT, Joi AI, CrushOn.AI, and SpicyChat AI) while tracking unofficial "modded" or unlocked APKs for mainstream apps like Moemate and Anima AI. Finally, Korean (ko) tool aggregators (toolai.io/ko, aitools.aiting.com/ko) focus on privacy-centric uncensored chat and interactive storytelling platforms—including HoneyChat, Dreamle, Erogen AI, Open Spoken AI, and Deep Realms—alongside local-processing suites like HackAIGC.

Empirical Usage Signals and Traffic Distribution Mechanics

Analysis of objective web traffic estimates (via Semrush and Similarweb) and mobile application store telemetry (via Google Play Store) demonstrates an extreme power-law distribution in platform usage. At the apex of the uncensored hosted ecosystem, Janitor AI recorded 189.54M monthly visits in September 2026 (following 198.35M in July and 197.76M in June), slightly surpassing mainstream benchmark Character.AI (176.48M–176.5M visits in September 2026). SpicyChat AI occupies the

second tier among dedicated adult roleplay platforms with 68.9M (Similarweb) to 96.64M (Semrush) monthly visits, followed by PolyBuzz (45M web visits plus 50M+ Google Play downloads), CrushOn.AI (28.4M to 40.19M monthly visits), and Candy AI (23.5M monthly visits).

Top Uncensored Roleplay Platforms Rival Mainstream Benchmarks in Traffic and Session Depth

JANITOR AI MOBILE SHARE
87.53% mobile
12.47% desktop (Semrush telemetry)

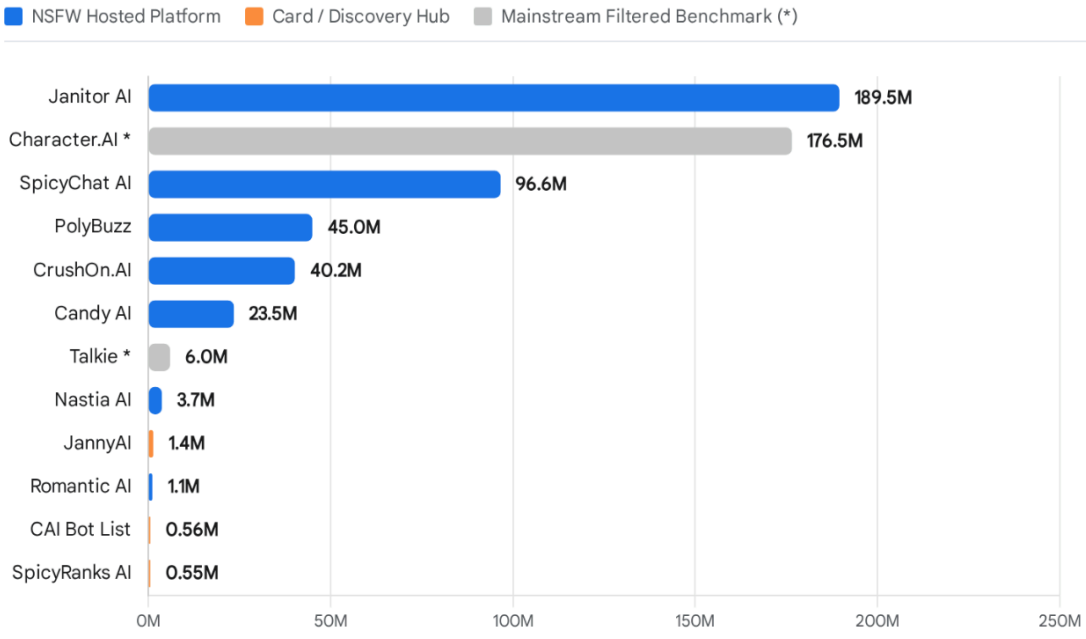

SPICYCHAT MOBILE SHARE
90.25% mobile
9.75% desktop (Semrush telemetry)

DIRECT TRAFFIC DOMINANCE
72%–90% direct
Users bypass store/search engines

Monthly Web Visits (Millions)

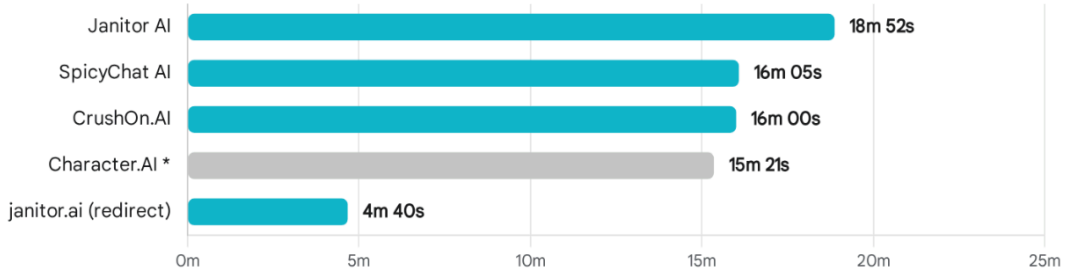

Primary monthly visitor volume benchmarked across tracked ecosystems

All Tracked (12) | NSFW Ecosystem (10)

Average Visit Duration (Minutes)

Telemetry verified via Semrush and Similarweb clickstream panels

Leading uncensored roleplay platforms generate tens of millions of monthly visits with average session durations exceeding 14 minutes. Gray bars denote mainstream filtered benchmarks included in cross-shopping telemetry.

Data sources: Semrush, Similarweb, Exploding Topics, Developer Bazaar, AI Agent Store, Reddit (r/CharacterAIrunaways), Plisio

Three deeper structural phenomena emerge from the cross-platform usage telemetry. First, mobile web browsers serve as the primary distribution vector to circumvent app store content restrictions. On Janitor AI, mobile devices account for 87.53% of all web visits versus 12.47% on desktop; on SpicyChat AI, mobile devices drive 90.25% of visits versus 9.75% on desktop. Because Apple App Store and Google Play Store policies restrict adult content, pure-play uncensored platforms operate primarily as mobile web applications or Progressive Web Apps (PWAs), whereas platforms that maintain major Google Play footprints—such as PolyBuzz (50M+ downloads, 4.0 rating), Botify AI (1M+ downloads, 3.8 rating), Nomi AI (100K+ downloads, 3.8 rating), and Replika (4.2 rating)—either enforce strict image and text guardrails in their store builds or gate mature modes behind subscription toggles. Furthermore, official brand names on app stores attract unofficial third-party clone or guide apps (such as Sierra Mullins' nomi.ai.friend.chat with 10K+ downloads or Poly AI: Chat AI Friends Hint) attempting to capture organic store search queries.
Second, direct traffic dominance and long session durations indicate habitual retention rather than search-driven acquisition. Direct navigation accounts for 90.3% of mobile and desktop traffic on Semrush (72.34% desktop direct on Similarweb) for Janitor AI and 81.77% (66.45% desktop direct on Similarweb) for SpicyChat AI, with average session durations reaching 17:05 to 18:52 on Janitor AI (14.16 pages per visit) and 14:00 to 16:05 on SpicyChat AI (12.83–13.02 pages per visit). Users discover platforms via referral hubs—such as theporndude.com, rule34video.com, crushon.ai, saucepan.ai, caibotlist.com, and jannyai.com—and subsequently access them directly via browser bookmarks. Outbound traffic telemetry from Janitor AI (imgchest.com at 4.38%, catbox.moe at 4.37%, and k-id.com at 4.94%) also reveals the auxiliary infrastructure used by the ecosystem: external image hosting for bot avatars and third-party age-verification gateways (k-id.com, ageverif.com) deployed in response to tightening regulatory compliance.
Third, demographic composition varies significantly between community roleplay catalogs and visual AI companion simulators. While visual

girlfriend platforms like Candy AI skew 81% male and SpicyChat AI skews 75.12% male (24.88% female), narrative roleplay leader Janitor AI records a 37.46% female audience share (62.54% male), reflecting substantial female participation in long-form fictional and romance roleplay.

Platform / Domain	Ecosystem Role	Monthly Web Visits	Engagement Telemetry (Duration / Pages / Bounce)	App Store Telemetry (Downloads / Rating)	Primary Traffic & Demographic Signals
Janitor AI (janitorai.com)	Hosted Platform	189.54M (Semrush Sep 2026); 198.35M (Jul 2026); 97M (Similarweb Jan 2026)	18:52 duration (Semrush); 17:05 duration, 14.16 pages/visit, 31.01% bounce (Similarweb)	null	87.53% mobile; 62.54% male / 37.46% female; 38.5% US traffic; Global Rank #199–#216.
Character.AI (character.ai)	Hosted Platform (Filtered Benchma	176.48M–176.5M (Semrush /	15:21 duration, 12.25 pages/vis	null	71.8% direct desktop traffic;

	rk)	Exploding Topics Sep 2026); 194M (Jan 2026)	it, 36.96% bounce (Similarweb)		13.5M organic search; Global Rank #195.
SpicyChat AI (spicychat.ai)	Hosted Platform	96.64M (Semrush Sep 2026); 69.6M (Similarweb Sep 2026); 68.9M (Toolify Aug 2026)	16:05 duration (Semrush); 14:00–14:36 duration, 12.83–13.02 pages/visit, 38.81%–40.11% bounce	null	90.25% mobile; 75.12% male / 24.88% female; 31.83% US traffic; Global Rank #382.
PolyBuzz (polybuzz.ai / poly.ai)	Hosted Platform	45M (Similarweb Jan 2026)	null	50M+ downloads; 4.0 star rating (Google Play)	Mature 17+ rating on Google Play; operated by Cloud Whale Interactive

					Technology LLC.
CrushOn.AI (crushon.ai)	Hosted Platform	40.19M (Semrush Aug/Sep 2026); 28.4M (Similarweb 2026); 23M (Jan 2026)	>16:00 duration (Similarweb)	null	5.2M+ registered users; 66.79% organic social / direct share; Global Rank #1,407.
Candy AI (candy.ai)	Hosted Platform	23.5M (Similarweb Feb 2026)	null	null	81% male audience; Global Rank ~#1,340; 1.4K tracked search keywords.
Talkie (talkie-ai.com)	Hosted Platform	5.98M (Semrush 2026)	32.65% bounce rate (Semrush)	null	Authority Score 56; cross-shopped with SpicyCha

					t AI and Character.AI.
Nastia AI (nastia.ai)	Hosted Platform	3.74M (Semrush Sep 2026)	null	null	Top audience overlap with spicychat.ai and juicychat.ai.
JannyAI (jannyai.com)	Card / Lore Hub	1.38M (Semrush Sep 2026)	null	null	Primary character search/indexing companion visited by janitor.ai users.
Romantic AI (romanticai.com)	Hosted Platform	1.15M (Semrush Sep 2026)	null	null	Global Rank #36,413 (Similarweb Sep 2026); top affinity competitor to

					SpicyChat AI.
CAI Bot List (caibotlist.com)	Card / Lore Hub	561.57K (Semrush Sep 2026)	null	null	Top cross-browsed character directory for janitorai.com visitors.
SpicyRanks AI (spicyranks.ai)	Other (Directory / Ranker)	545.61K (545,608 Similarweb 2026; 534,912 prior month)	00:13 duration, 1.64 pages/visit, 44.23% bounce	null	37.17% organic search traffic; 35.22% US, 26.61% India; Global Rank #1,170,395.
Janitor.ai Redirect (janitor.ai)	Hosted Platform (Secondary Domain)	287.66K (Semrush Sep 2026); 310.57K (Jul 2026)	04:40 duration (Semrush); 00:14 duration, 1.52 pages/vis	null	85.79% mobile; 75.45% male / 24.55% female; 40.44%

			it, 45.77% bounce (Similarweb)		outbound flow goes to janitorai.com.
Botify AI (botify.ai)	Hosted Platform	null	null	1M+ downloads; 3.8 star rating (Google Play)	Operated by Ex-human, Inc.; Mature 17+ rating.
Nomi AI (nomi.ai)	Hosted Platform	null	null	100K+ downloads; 3.8 star rating (Google Play)	Mature 17+ rating (ai.nomi.twa); unofficial clone nomi.ai.friend.chat has 10K+ downloads.
Replika (replika.ai)	Hosted Platform	null	null	4.2 star rating (4.3 in UZ locale, Google	~40M cumulative historical users reported

				Play)	in industry analysis; operated by Luka, Inc.

Complete Supply Census JSON Specification

The following JSON structure records the complete census of 48 distinct sources (spanning English, Japanese, Chinese, Korean, Spanish, and Portuguese across all specified directory and community categories) and 210 distinct platforms and ecosystem tools identified across those sources, strictly adhering to the required schema and null-handling rules.

directories, blocklists, community forums, app stores, and traffic-ranking services across six languages (EN, JA, ZH, KO, ES, PT) through October 2026. Objective usage metrics (monthly web visits, app download ranges, and store ratings) are recorded exclusively where verified by third-party telemetry (Semrush, Similarweb) or official store listings (Google Play Store); all unverified metrics are strictly left null without estimation. Web traffic figures represent browser-based sessions and do not capture native app API calls, Telegram bot message volumes, or local offline LLM execution."

END OF SUPPLY
